Local Market Index Indicator Codes

What are Local Market Index Indicator Codes?

These codes allow you to identify those issues that make up a local market index. For example, the following formula identifies all issues that make up the Toronto Stock Exchange 300:

@SET($GI+$FI,LMII=81)

Up to two different codes may be used for each issue, determined primarily by the exchange on which the issue trades. Not all Local Market Index Indicators are currently available.

Local Market Index Indicator Codes in Numerical Order
